PROFESSIONAL SUMMARY

Computer Science engineering student focused on full stack development, backend engineering, UI/UX design, and AI/ML systems. Experienced in building scalable web applications, offline AI systems, Flutter applications, and developer productivity tools. Passionate about practical software engineering, privacy-focused AI, and solving real-world problems through technology.

EDUCATION

Dhanalakshmi Srinivasan Engineering College	2023 – 2027
<i>B.Tech in Computer Science and Engineering</i>	<i>Tamil Nadu</i>
Sivapuram Higher Secondary School	2022
<i>Senior Secondary (XII), Science – 89%</i>	<i>Kerala</i>
Bafakhy Thangal Memorial Higher Secondary School	2020
<i>Secondary (X) – 90%</i>	<i>Kerala</i>

EXPERIENCE

Flutter Development Intern	Jun 2025 – Jul 2025
<i>SMEC Technologies, Ernakulam</i>	
– Learned Flutter fundamentals and mobile application development concepts – Designed responsive and user-friendly UI layouts – Worked with color schemes and interface structuring – Improved understanding of frontend mobile development workflows	

PROJECTS

Medical Imaging and Lab Report Explainer AI	2026
<i>Privacy-First Offline AI Medical Assistant</i>	
– Built a secure offline AI application that analyzes medical reports and generates explanations for patients and clinicians – Developed using FastAPI, GPT4All (Phi-3 Mini), HTML, CSS, and JavaScript – Implemented PDF/text extraction, local AI inference, accessibility-focused UI, and trusted medical citation support – Focused on privacy-first architecture with fully local processing and zero external API usage	
CodeGent - AI Coding Assistant Agent	2026
<i>Developer Productivity and Coding Assistance Tool</i>	
– Built an AI-powered coding assistant focused on helping developers with programming workflows and debugging – Designed to assist with code generation, debugging, technical explanations, and development guidance – Focused on improving developer productivity through AI-assisted coding support – Worked on structured prompting, backend logic, and user-friendly interaction flows	
Studentz Bangalore Student Community Platform	2026
<i>Student Issue Reporting and Community Platform</i>	
– Built a student-focused community platform for reporting and tracking academic, campus, and wellbeing-related issues – Developed using React, Vite, Node.js, Express.js, and MongoDB – Implemented issue submission workflows, reference ID-based tracking, and responsive user interfaces – Designed scalable backend APIs and database models using Express and Mongoose – Website: studentzbangalore.vercel.app	
Nexora - Smart Personal Finance & Expense Tracker	2026
<i>AI-Powered Finance Tracking Application</i>	
– Developed an AI-powered finance tracking application with expense analytics, OCR-based receipt parsing, and machine learning expense prediction – Built using Next.js, React, Tailwind CSS, Firebase, and Scikit-learn – Implemented automated expense categorization, budget alerts, interactive dashboards, and PDF report generation – Integrated Firebase Authentication, Firestore cloud sync, and OCR processing using Tesseract.js	
AI Learning Platform for Kids	2026
<i>Interactive Educational AI Platform</i>	
– Built an interactive AI-powered learning platform featuring voice tutoring, handwriting OCR, quizzes, and parent analytics – Developed using React, Vite, FastAPI, GPT4All, EasyOCR, and Edge-TTS – Implemented AI handwriting feedback, speech synthesis, gamified learning streaks, and animated educational experiences – Designed a responsive glassmorphic UI with accessibility-focused interactions	
CineSnap Social Platform for Movie Enthusiasts	2026
<i>Flutter-Based Social Media Application</i>	

- Developed a Flutter-based social application for cinephiles to share cinematic experiences
- Integrated Firebase Authentication, Firestore, Firebase Storage, and Supabase
- Implemented dark-themed glassmorphic UI, staggered grid layouts, and responsive user experiences
- Used Provider for efficient state management and optimized sharing workflows

Instagram Frontend Clone using Flutter

2026

Mobile UI/UX Development Project

- Built a responsive Instagram-inspired frontend application using Flutter
- Focused on UI replication, smooth layouts, and responsive mobile experiences
- Improved understanding of Flutter widgets and frontend architecture

Beginner Operating System Project

2026

Low-Level Systems Programming Exploration

- Explored the development of a bootable operating system from scratch
- Learned about bootloaders, memory management, and low-level system programming concepts
- Worked with Assembly language and C while studying operating system internals

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C, C++, Assembly

Frontend Development: HTML, CSS, React, Flutter, Tailwind CSS, Vite, UI/UX Design

Backend Development: Node.js, Express.js, FastAPI, Django

Databases & Cloud: MongoDB, Firebase Firestore, Supabase

AI / Machine Learning: GPT4All, Machine Learning Fundamentals, OCR Systems, Scikit-learn, EasyOCR, AI-assisted Applications

Tools & Platforms: Git, GitHub, Canva, Adobe After Effects, Tesseract.js

Core Strengths: Problem Solving, Self Learning, Backend System Design, API Development, Accessibility-Focused Interfaces

AREAS OF INTEREST

- Full Stack Web Development
- Backend Engineering
- Artificial Intelligence and Machine Learning
- Mobile Application Development
- UI/UX Design
- Low-Level Systems Programming
- Privacy-Focused AI Systems

ACADEMIC ACHIEVEMENTS

- Secured 89% in Higher Secondary Education
- Secured 90% in Secondary Education
- Built multiple AI-powered and full stack software projects as a student developer
- Continuously improving technical skills through self-driven practical learning
